Mobile: +63 908-587-8799

Technology enthusiast aiming to contribute experience in software testing, documentation, and SDLC-based projects. Skilled in troubleshooting application issues, handling incidents, and providing user support by analyzing and resolving system-related concerns.

Has experienced in creating and executing test cases, identifying and documenting defects, and validating application functionality against requirements to ensure system reliability and quality.

Strong analytical and problem-solving skills, with a commitment to delivering effective application support and continuously improving technical knowledge and professional growth.

SKILLS

- ✓ Testing: functional, regression, smoke/sanity, API testing, cross-browser/device, usability; techniques: Equivalence partitioning, Structural Testing.
- ✓ Tools: Jira, TestRail (or "test case management via Google Sheets"), Git, SQL.
- ✓ Dev/Platforms: HTML/CSS/JS, PHP, MySQL, Unity C#, Windows.
- ✓ Practices: FURPS, SDLC, White Box.

PROJECTS

Design and Development of an Assets Borrowing Management System for NU Laguna ITSO Office

Capstone 1 Project System | Role: Developer, QA Tester and Documentation

- Collaborated with project stakeholders to analyse business requirements and support the development of an asset borrowing management system.
- Performed system validation, cross-browser testing (Chrome, Firefox, Edge), ensuring application functionality and data accuracy via SQL verification.
- Logged, documented, and tracked system issues and defects, supporting troubleshooting and application improvement efforts.
- Constructed test scripts and documented defects, system gaps, and testing results to support software quality improvement.
- Assisted in User Acceptance Testing (UAT), validating system behavior against business requirements and end-user needs.
- Maintained technical documentation and supported application enhancements using HTML, CSS, JavaScript, PHP, and MySQL.

Dash Out

Capstone 2 Project Application | Role: QA Tester and Documentation

- Designed and executed test scenarios to validate system functionality, workflows, and application behavior across Android devices (Android 11–14).
- Identified, documented, and tracked defects with detailed reproduction steps, expected vs. actual results, and supporting evidence to facilitate issue resolution.
- Analyzed system gaps, application performance, and usability concerns, providing testing insights and recommendations to support continuous improvement throughout the development lifecycle.

EXPERIENCE

IT Support Intern, Concentrix, Makati City Philippines | Jan 2025 - May 2025

- Managed 60+ support tickets, ensuring timely resolution and maintaining a 95% SLA compliance rate.
- Executed OS migration testing for 50+ devices, validating system functionality and ensuring zero post-migration incidents.

EDUCATION

BS Information Technology, National University Laguna (2021-2025)

- Relevant coursework : Website Development, Game Development, Software Testing, Database, Application Support
