Entry-level IT and Quality Assurance Tester with experience in manual testing, web and mobile developer application, testing, software documentation, and SDLC-based academic projects. Familiar with functional testing, white-box testing, FURPS quality model, bug documentation, and database management using MySQL.Experienced in analysing system issues, supporting IT operations, and collaborating with development teams to deliver technology solutions aligned with business requirements.

SKILLS

- Testing: functional, regression, smoke/sanity, API testing, cross-browser/device, usability; techniques: Equivalence partitioning, Structural Testing .
- Tools: Jira, TestRail/Zephyr (or "test case management via Google Sheets"), Git, SQL
- Dev/Platforms: HTML/CSS/JS, PHP, MySQL, Unity C#, Windows.
- Practices: FURPS, SDLC, White Box.

ACADEMIC PROJECTS

Design and Development of an Assets Borrowing Management System for NU Laguna ITSO Office

- Capstone 1 Project System | Role: Developer, QA Tester and Documentation
  - Collaborated with project stakeholders to analyse business requirements and support the development of an asset borrowing management system.
  - Supported application development and feature enhancement using HTML, CSS, JavaScript, PHP, and MySQL technologies.
  - API validation for CRUD endpoints; verified DB changes via SQL.
  - Constructed test scripts and documented defects, system gaps, and testing results to support software quality improvement.
  - Performed cross-browser tests (Chrome, Firefox, Edge) and responsive checks.
  - Maintained QA and technical documentation including test cases, bug reports, and implementation records.
  - Supported user acceptance testing (UAT) activities and validated system behaviour against business requirements.

Dash Out

- Capstone 2 Project Application | Role: QA Tester and Documentation
  - Designed level-progression test scenarios; 45 test cases across 3 difficulty tiers.
  - Device tests on Android 11–14; identified collision-edge bug causing soft-locks (P1).
  - Logged defects with repro steps, expected/actual, screenshots and build tags.
  - Monitored gameplay behaviour and identified system gaps affecting application performance and user experience.
  - Supported continuous improvement initiatives by providing testing recommendations and usability feedback during development cycles.

EXPERIENCE

- IT Support Intern, Concentrix, Makati City Philippines | Jan 2025 - May 2025
  - Managed 60+ tickets; met 95% SLA. Executed OS migration test checklist for 50+ devices with zero post-migration Sev1 incidents.

EDUCATION

- BS Information Technology, National University Laguna (2021-2025)
- Relevant coursework : Software Testing, Manual Testing, Databases, SDLC, Web Dev
