Mobile: +63 908-587-8799

Detail-oriented IT graduate with experience in software testing, SDLC-based projects, and technical documentation. Skilled in analyzing system behavior, troubleshooting issues, and validating application functionality through structured testing and problem-solving.

Has strong analytical and investigative skills with a keen interest in cybersecurity, security operations, and incident analysis. Eager to apply technical knowledge, learn security monitoring tools and processes, and contribute to protecting systems and applications while continuously developing expertise in cybersecurity.

SKILLS

- ✓ Testing: functional, regression, smoke/sanity, API testing, cross-browser/device, usability; techniques: Equivalence partitioning, Structural Testing.
- ✓ Networking & Security: OSI Model, TCP/IP, DNS, DHCP, Cybersecurity Fundamentals
- ✓ Tools & Technologies: Jira, TestRail, Git, SQL, MySQL, Windows
- ✓ Practices: FURPS, SDLC, White Box, Waterfall and Iterative

PROJECTS

Design and Development of an Assets Borrowing Management System for NU Laguna ITSO Office

Capstone 1 Project System | Role: Developer, QA Tester and Documentation

- Collaborated with project stakeholders to analyse business requirements and support the development of an asset borrowing management system.
- Performed system validation, cross-browser testing (Chrome, Firefox, Edge), ensuring application functionality and data accuracy via SQL verification.
- Logged, documented, and tracked system issues and defects, supporting troubleshooting and application improvement efforts.
- Identified, documented, and tracked defects throughout the Defect Life Cycle using structured test documentation, supporting timely issue resolution and software quality improvement.
- Supported User Acceptance Testing (UAT) by validating system functionality against business requirements and ensuring readiness for deployment.
- Maintained technical documentation and supported application enhancements using HTML, CSS, JavaScript, PHP, and MySQL.

Dash Out

Capstone 2 Project Application | Role: QA Tester and Documentation

- Created and executed end-to-end test plans, test scenarios, and test cases to validate functionality, business workflows, and mobile application behavior across Android 11–14 devices.
- Identified, documented, and tracked defects with detailed reproduction steps, expected vs. actual results, and supporting evidence to facilitate issue resolution.
- Analyzed system gaps, application performance, and usability concerns, providing testing insights and recommendations to support continuous improvement throughout the development lifecycle.

EXPERIENCE

IT Support Intern, Concentrix, Makati City Philippines | Jan 2025 - May 2025

- Managed 60+ support tickets, ensuring timely resolution and maintaining a 95% SLA compliance rate.
- Executed OS migration testing for 50+ devices, validating system functionality and ensuring zero post-migration incidents.

EDUCATION

BS Information Technology, National University Laguna (2021-2025)

- Relevant coursework : Website/Game Development, Software Testing ,Databases, Network Configuration, Cisco
